Participate in a longitudinal study about adolescent health and well-being (contacted annually for 3 years following the first assessment)

Participate at Virginia Tech in Blacksburg or Virginia Tech Carilion Research Institute in Roanoke

Adolescent and caregiver participate in a short interview, fill out questionnaires, and play simple computer games

Adolescent (but not caregiver) gets a brain scan and receives a CD with MRI images of their brain

The caregiver will be paid $75-$105, and the adolescent will also be paid $75-$105.*

If you are interested, please call or text us at (540) 558-8239 or email at lifespan@vt.edu.

Check out http://www.psyc.vt.edu/labs/jklifespan for more information.

* Travel compensation will be provided at $0.20 per mile.
